THREE POINT HITCH HAY RAKES P SERIES

The TONUTTI P Rakes are the ideal solution for Hobby Farmers, Horse Farmers, for farmers who need to clean up on their property or in mountain areas due to its small dimensions and 3-point hitch mount.

Two finger wheels are mounted on each rake arm. The rake arms are independent from the rake frame and the rake frame is also independent from the rake head. Shock absorbing springs on the three point rake head relieves the ground pressure from the finger wheels. Each finger wheel consists of 40 heat treated tines made of high quality spring material, which guarantee a long lasting operation without breakage.

The simplicity of the P Series along with the independence of each component allow the rake to adapt itself perfectly to all kinds of uneven terrain. Together with the special shaped tines which filter all kinds of dirt and stones the P rake produces a perfectly clean windrow.

This rake requires very little maintenance. All Tonutti three point hitch hay rakes P series have standard parts that are interchangeable (finger wheels, head, arms and tines).
